Lab Manual Updates

- Pg 32 Make sure your shortcut is 'SoftLogix' – screen capture has a typo
- Pg 43 *C:\LabFiles\ Lab 15 FactoryTalk View SE* should be LabFiles not LabFiles
- Pg 74 after step 16 – go to the Filters property page. Observe that the default filter is set so that Normal and Unacknowledged alarms do not appear in the Tank Summary
- Pg 116 – 117 Step 7 will occur after Step 5
- Pg 119 TankCooling_Group should be TankCoolingTemp_Group
- Pg 120 Step 6 should read Right-click on the reference object instead of Single-click
- Pg 134 Step 9 screen capture shows 57 for width, enter 43 for width
