

Plex Mobile Device Support Policy

The following is a list of supported barcode scanners that are tested to ensure high compatibility with Plex software and we would encourage our customers to use the below list of devices for best results and support. Although there might be other devices that might be supported and can work with Plex software, since Plex has a limited number of devices that we can maintain and test, we cannot guarantee optimum support for these devices.

DEVICE	LAST OS VERSION TESTED
Honeywell CT60	Android 10
Honeywell CK65	Android 11
Keyence BTA700	Android 11
Zebra TC8300	Android 11
Zebra MC9300	Android 11
Zebra TC52X	Android 10

OS Support Policy

The following is the OS support policy which is to ensure high degree of compatibility between the mobile devices being used and Plex Mobile app. Although you might be able to use the Plex Mobile app from one of the unsupported version with limited support, we do encourage our users to use one of the OS versions listed below on their mobile device.
