⁽¹⁾ Beginning in fiscal 2019, we adopted a new pension standard (ASU 2017-07) regarding the presentation of net periodic pension and postretirement benefit costs. In accordance with this standard, the service cost component of net periodic benefit cost is included in Cost of sales and Selling, general and administrative expenses in the Consolidated Statement of Operations and all other components have been reclassified from Cost of sales and Selling, general and administrative expenses to Other (expense) income. As a result, all prior period presentation on this page and those that follow have been reclassified from Cost of sales and Selling, general and administrative expenses to Other (expense) income. As a result, all prior period presentation on this page and those that follow have been restated to conform to this standard.

(2) Beginning in fiscal 2010, we changed our accounting for earnings per share as a result of the new guidance issued by FASB, which requires the calculation of EPS pursuant to the two-class method. This resulted in a reduction in earnings per share of \$0.01 in certain periods.

| Total segment operating margin ⁽¹⁾ | | 21.3% | | 19.9% | | 19.9% | | | | |

⁽¹⁾ Total segment operating earnings and total segment operating margin are non-GAAP financial measures and impairment. We exclude purchase accounting depreciation and amortization, corporate and other, non-operating pension and postretirement benefit cost, change in fair value of investments, the \$70 million legal settlement in fiscal 2021, interest expense, net, and income tax provision because we do not consider these items to be directly related to the operating performance of our segments. We believe total segment operating earnings and total segment operating margin are useful to investors as measures of operating performance. We use these measures to monitor and evaluate the profitability of our operating segments. Our measures of total segment operating earnings and total segment operating margin may be different from measures used by other companies.

(1) In April 2015; the Financial Accounting Standards Board (FASB) issued new guidance retrospectively as of September 30, 2015. We have included \$9.4 million and \$5.2 million of debt issuance costs associated with our long-term debt as a reduction of long-term debt, which we previously included within other assets, at September 30, 2015 and 2014, respectively. For purposes of the table above, this guidance has been applied only to fiscal 2014 and 2015.

⁽²⁾ In November 2015, the FASB issued new guidance that requires all deferred income taxes to be classified on the balance sheet as noncurrent assets or liabilities rather than separating current and noncurrent deferred income taxes based on the classification of the related assets and liabilities. This requirement is effective for us no later than October 1, 2017; however, we elected to adopt earlier as of December 31, 2015. Upon adoption of this guidance we retrospectively reclassified \$151.2 million of deferred income taxes to noncurrent assets to noncurrent assets to noncurrent assets asset on 2015.

(1) Free Cash Flow is a non-GAAP measure. See Other Supplemental Information: Free Cash Flow for the definition and reasons why management believes this information is useful to investors.

⁽²⁾Cash, cash equivalents, and restricted cash at September 30, 2022, 2021, and 2020, includes \$17.2M (\$8.6M in Other assets on the Condensed Consolidated Balance Sheet), \$17.2 million (\$17.2M in Other assets on the Condensed Consolidated Balance Sheet), september 30, 2022, 2021, and 2020, includes \$17.2M (\$8.6M in Other assets on the Condensed Consolidated Balance Sheet), \$17.2 million (\$17.2M in Other assets on the Condensed Consolidated Balance Sheet), respectively, of restricted cash.

Return on Invested Capital (in millions, except percentages)

(unaudited)

Return On Invested Capital (ROIC) is a non-GAAP financial measure. We believe that ROIC is useful to investors as a measure of performance and of the effectiveness of the use of capital in our operations. We use ROIC as one measure to monitor and evaluate our performance. Our measure of ROIC may be different from that used by other companies. We define ROIC as the percentage resulting from the following calculation:

(a) Net Income, before Interest expense, Income tax provision, and Purchase accounting depreciation and amortization, divided by;

(b) average invested capital for the year, calculated as a five quarter rolling average using the sum of Short-term debt, Long-term debt, Shareowners' equity, and Accumulated amortization of goodwill and other intangible assets, minus Cash and cash equivalents, Short-term investments, and long-term investments (fixed income securities), multiplied by;

(c) one minus the effective tax rate for the period.

ROIC is calculated as follows (in millions, except percentages):

| ······································ |). | | | | | | | | | | | | | | |
|---|------------|------------|------------|------------|------------|------------|------------|---------------|-------------|------------|------------|------------|------------|------------|------------|

Adjusted Income, Adjusted EPS and Adjusted Effective Tax Rate

Adjusted Income, Adjusted EPS and Adjusted Effective Tax Rate are non-GAAP earnings measures that exclude non-operating pension and postretirement benefit cost, purchase accounting depreciation and amortization, and impairment expense attributable to Rockwell Automation, change in fair value of investments, and Net income (loss) attributable to noncontrolling interests, including their respective tax effects.

We believe that Adjusted Income, Adjusted EPS and Adjusted Effective Tax Rate provide useful information to our investors about our operating performance and allow management and investors to compare our operating performance period over period. Adjusted EPS is also used as a financial measure of performance for our annual incentive compensation. Our measures of Adjusted Income, Adjusted EPS and Adjusted Effective Tax Rate may be different from measures used by other companies. These non-GAAP measures should not be considered a substitute for Net income attributable to Rockwell Automation, diluted EPS, and effective tax rate.

The following are reconciliations of Net income attributable to Rockwell Automation, diluted EPS, and effective tax rate to Adjusted Income, Adjusted EPS, and Adjusted Effective Tax Rate, respectively (in millions, except per share amounts and percentages):

| | Y | ear End | ded Septembe | r 30, | |
|---|---------------|---------|--------------|-------|---------|
| | 2023 | | 2022 | | 2021 |
| Net income attributable to Rockwell Automation | \$ 1,387.4 | \$ | 932.2 | \$ | 1,358.1 |

Free Cash Flow

Our definition of free cash flow, which is a non-GAAP financial measure, takes into consideration capital investments required to maintain the operations of our businesses and execute our strategy. In the first quarter of fiscal year 2017, we adopted a new share-based compensation accounting standard that requires the excess income tax benefit from share-based compensation to be classified as an operating, rather than as a financing, cash flow. In previous periods, we added this benefit back to our calculation of free cash flow in order to generally classify cash flows arising from income taxes as operating cash flows. Beginning in the first quarter of fiscal year 2017, no adjustment is necessary as this benefit is already included in operating cash flows.

In our opinion, free cash flow provides useful information to investors regarding our ability to generate cash from business operations that is available for acquisitions and other investments, service of debt principal, dividends and share repurchases. We use free cash flow, as defined, as one measure to monitor and evaluate performance, including as a financial measure for our annual incentive compensation. Our definition of free cash flow may be different from definitions used by other companies.

Components of Pension and Postretirement Benefit Expense

We have adopted ASU 2017-07, which defines operating and non-operating pension and postretirement benefit cost. Under this new standard, only the service cost component of pension and postretirement benefit cost are considered to be non-operating costs. These components of net periodic pension and postretirement benefit cost primarily relate to changes in pension assets and liabilities that are a result of market performance; we consider these and other excluded costs to be unrelated to the operating performance of our business.

The following are the components of operating and non-operating pension and postretirement benefit costs (in millions):

| | | | | | | | Year ende | d September 3 |), | | | | | | |
|---|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|------------------------|
| | 2023 | 2022 | 2021 | 2020 | 2019 | 2018 | 2017 | 2016 | 2015 | 2014 | 2013 | 2012 | 2011 | 2010 | 2009 |

Cumulative Effect of Accounting Change

Effective September 30, 2006, we adopted FIN 47, which clarifies the guidance included in SFAS No. 143, *Accounting for Asset Retirement Obligations* (SFAS 143). Under FIN 47, companies must accrue for costs related to a legal obligation associated with the retirement of a tangible long-lived asset that results from the acquisition, construction, development or the normal operation of the long-lived asset. The application of FIN 47 resulted in a charge to continuing operations, net of tax, of \$17.7 million included in the Consolidated Statement of Operations for the year ended September 30, 2006 as the cumulative effect of change in accounting principle.
