FactoryTalk View SE Programming Course Description

COURSE AGENDA

Day 1
- Getting Started with FactoryTalk View SE
- Configuring RSLinx Enterprise Communications in a New FactoryTalk View SE Application
- Configuring OPC Communications
- Creating an HMI Tag Database

Day 2
- Creating a Graphic Display
- Building an Interactive Graphic Display
- Animating a Graphic Display

Day 3
- Using Tag Placeholders and Creating a FactoryTalk View SE Client
- Configuring Global Objects
- Configuring HMI Tag-Based Alarms
- Configuring FactoryTalk Alarms and Events
- Creating and Viewing a Data Log Model

Day 4
- Creating and Configuring a Trend
- Creating a Derived Tag File and an Event File
- Creating Symbols, Macros, and Keys
- Configuring Security

Day 5
- Optional: Adding VBA Display Code
- Creating a Network FactoryTalk View SE Application

COURSE NUMBER: CCV207

Course Purpose
Upon completion of this course, you should be able to organize and develop FactoryTalk View Site Edition (SE) applications.

This course provides opportunities for you to work with local FactoryTalk View SE applications.

During class, you will have the opportunity to practice the skills used to create an application and build graphic displays.

You will learn how to configure alarms and security, trend data, and test your application using FactoryTalk View SE Client. You will also work with RSLinx Enterprise communications software and the FactoryTalk Diagnostics system.

After practicing these skills in a local application, you will receive a high-level overview of how a network application is created.

Who Should Attend
Individuals who need to develop FactoryTalk View SE local (stand-alone) or network (distributed) applications should attend this course.
Prerequisites
To successfully complete this course, experience operating a personal computer within a Microsoft Windows® XP or Windows 7 environment is recommended.

Technology Requirements
All technology is provided for student use in the classroom by Rockwell Automation. It is not necessary for students to bring any technology with them when attending this course.

Student Materials
To enhance and facilitate your learning experience, the following materials are provided as part of the course package:
- *Student Manual*, which contains the key concepts, definitions, and examples presented in the course.
- *FactoryTalk View SE Procedures Guide*, which provides all the steps required to complete common RSView SE application development tasks, including the tasks in the exercises. By following the procedures in this job aid, you can immediately apply what is learned in the course to your own job.

Hands-On Practice
Throughout the course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises. These exercises focus on the skills introduced in each lesson.

Next Learning Level
After mastering the skills covered in this course, you will have the knowledge and skills necessary to learn more specialized tasks. In particular, this course is a prerequisite for the *FactoryTalk View SE Architecture* course (Course No. CCV205-LD).

Course Length
This is a 4.5 day course.

Course Number
The course number is CCV207

IACET CEUs
CEUs Awarded: 3.2

To Register
To register for this or any other Rockwell Automation training course, contact your local authorized Allen-Bradley Distributor or your local Sales/Support office for a complete listing of courses, descriptions, prices, and schedules.
